Comment :

"The Illinois State Police (ISP) serves the general public in a fair and impartial manner. As the provisions of the Pedestrian Stop Study continue, the ISP remains committed to being transparent in its day to day interactions with citizens by providing its data.

Everyday, ISP officers use their training effectively to determine whether further investigation is needed in order to affect an arrest.

With this being the first year of the study, the Department will evaluate the data from next year's results and make changes accordingly.

As in years past, the ISP will continue to offer its officers timely training as it relates to interacting with the public. In 2016, all ISP sworn officers received Procedural Justice and Police Legitimacy Training, which emphasized treating all citizens in a civil and equitable manner. As part of their training at the ISP Academy, officers also receive Cultural Diversity and Understanding Perceptions of Biased-Based Policing."

Comment :

Normal, IL is a culturally diverse community, with pedestrian traffic in and around the Town fluctuating significantly during the academic year when Illinois State University and Heartland Community College are in session. Illinois State University, whose campus lies in the center of Normal, Illinois, recorded an enrollment of 21,039 students during the 2016 academic year. The demographic information recorded for the Town of Normal as published in this study does not reflect the latest US Census Bureau data, and certainly does not account for the influx of pedestrian traffic related to the University. Given this, it is unclear how the community demographic data assigned to Normal was ascertained.

Comment :

The Northlake Police Department is committed to fair and impartial traffic enforcement. Our officers fully support the purpose of Traffic Stop Data collection and stand against race profiling. In furtherance of this mission, Northlake has embraced the concept by committing resources to the development of real time stop data trend reviews by each officer and supervisor. Our officers support the ability to recognize and understand unintended trends well before the release of the state mandated annual report. Northlake is one of the only agencies in the state using state of the art software applications to review all officer stops in real-time.

The true minority make up of Northlake drivers:

The driving population in suburban Chicago is truly a transient one. The City of Northlake shares borders and several major roadways with jurisdictions some of which have an over 90% Estimated Minority Driving Population (EMDP). According Illinois Department of Transportation figures, as many as 100,000 vehicles travel through roadways in Northlake on any given day. Because Northlake is a known destination for shopping and commerce, many drivers from high EMDP communities commute to or through Northlake. For these reasons Northlake proposes other factors should be considered for driving population EMDP's. Assigning Northlake an EMDP score solely on residential census data leaves out important and readily available sources of driving population demographics.

Driving population considerations:

The Illinois School Report Card is described as the state's official source of information about public schools across Illinois. The most current report for 2015-2016 identifies two high schools serving Northlake as having a minority population of 84% and 97% respectfully. Comparing the official demographics of the state school records to IDOT census assigned EMDP for Northlake, reflects a variance of over 30 points. Northlake has used the inclusion of current and up to date quantified governmental data resources such as the School Report Card, and real- time officer stop data reviews, as a mission wide commitment to fair and impartial traffic enforcement in our city.
